

Nearly 80% of consumers have or may change their purchase preferences based on **environmental, social, and economic impact**.

CarbonBetter™ clean energy may be the **easiest and most effective** way to show your customers that you prioritize **sustainability** in your business.

### How Your Business Automatically Makes a Difference Each Month:

You **create clean energy** when we offset 100% of your electricity usage with renewable energy credits.

You **reduce carbon** released when we offset 100% of your natural gas usage with carbon credits.

You **plant trees** to capture carbon in the atmosphere as you use energy. This is energy for good.

## Share Your Impact

- ✓ Monthly Impact Updates
- ✓ Point of Sale Materials
- ✓ Provision Clean Energy Stickers

## The **CarbonBetter™** energy difference:

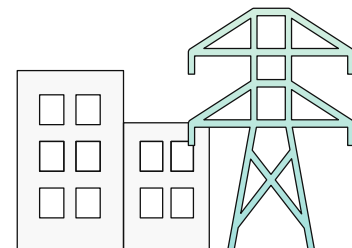

### Typical Suppliers

- ❌ Carbon is released when we dig up and burn fossil fuels for energy.
- ❌ Excess carbon warms the planet.
- ❌ There aren't enough trees to capture the excess, and it can remain in the atmosphere for hundreds of years.

### CarbonBetter Energy

- ✅ All plans include 100% offset electricity or natural gas, creating more available clean energy and releasing less carbon.
- ✅ We plant trees on every Provision plan. Trees work to capture excess carbon in the atmosphere and use it to grow.
